

About

Full Stack Developer with industry experience in both mobile (React Native) and backend (.NET / RESTful APIs) development. Comfortable working in team environments, maintaining systems, and proposing optimization solutions. Focused on clean architecture, performance, and delivering practical results.

Education

09/22 - 12/25

VTC ACADEMY - Da Nang
Software Engineering

Skills

Frontend: JavaScript, TypeScript, React Native, Next.js, TailwindCSS

Backend: .NET (C#), Node.js, MongoDB, MySQL, Firebase, Supabase

Tools & Platforms: Git, Render, Docker, Vercel, Postman

Soft Skills: AI Tools Proficiency, System Design, Git Workflow, Teamwork & Collaboration

Certificates

Certificate of Recognition –
Fastdo (2026)

Experiences

01/26 - 04/26

Fastdo Mobile Developer

Technologies: React Native, TypeScript, Nativewind, WebSocket, SignalR, .NET, MongoDB

- Built **chat module** features including message deletion/recovery, message forwarding, and group management with admin controls
- Developed UI proposals and Tool Tracking Click feature, delivering within deadlines while considering system **scalability** and **maintainability**
- Worked closely with QC tester to **debug** and stabilize chat module features across multiple release cycles
- Managed **Git workflow** including resolving merge conflicts and submitting pull requests for mentor code review

Projects

CRM Customer For Sales (Personal)

Technologies: Next.js, TypeScript, TailwindCSS, Redux, Firebase, Pub/Sub Google, .NET, MongoDB

- Integrated **Gmail & Google Calendar** via OAuth 2.0; auto-syncs emails and meetings into Customer Timeline
- Built **Firebase** realtime notification system — deal assignments instantly update bell badge
- Implemented **Kanban** board (dnd-kit) with **Firestore** realtime sync; deal stage changes broadcast instantly
- Structured with Layered Architecture and **SOLID** on backend; **MVVM** + service classes on frontend; optimized re-renders via DevTools
